RECENT EXPERIENCE & EDUCATION

BIBLES FOR AMERICA, INC.

Junior Software Engineer - Remote Contractor

Irvine, CA
May 2015 – Present

- Test-driven Ruby on Rails programming as part of a small team of remote developers, responsible for creating and maintaining web-application, deployed mid-July, 2015.
- Usability and feature upgrades for organization's order management system.

THE IRON YARD ATLANTA

Ruby on Rails Engineering, Web Development Boot Camp

Atlanta, GA
January 2015 – March 2015

- Three-month period of immersive instruction and practice at The Iron Yard Atlanta.
- Projects: <http://evankoch.com/apps>
- I have practice with TDD, HTML/CSS, Javascript, and Bootstrap.
- Coded with the winning team at Iron Yard's internal Hackathon, sponsored by SolTech Atlanta, where I coded with a four-person team to build the 'best overall' app.
- I am excited to continue my career trajectory, growing my software engineering skills as a dependable resource within a development team.

Emergency Preparedness Contractor

Atlanta, GA
July 2008 – June 2010

- Developed training modules for web-based emergency preparedness Learning Management System.
- Assisted Clients with planning, training, quality control and technical support of training services.

PERSONAL

- In the mental soup of web application development, I want to sharpen and grow my coding skills with new tools and techniques on a daily basis.
- I enjoy family time, golf, and I have a killer game of table tennis (although it's a bit out of practice).
